

HEGO Stainless Steel & Aluminium

HEGO, creating the best deal in aluminium and stainless steel since 1977.

HEGO is an international wholesaler and supplier of stainless steel and aluminium products. Our product range consists of coils, sheets, plates and long products in a wide selection of alloys, finishes and sizes. In addition to our product range we have our own in-house service centre for decoiling, cutting, polishing and coating of stainless steel and aluminium.

Family company

As a family company, providing personal assistance and long term relationships with our customers and suppliers have been of utmost importance to us since our founding. Our expert team of multilingual account managers offer help and guidance to your queries and give you made to measure advice. Furthermore, our efficient logistics and central location near the ports of Rotterdam and Antwerp guarantee a prompt delivery. Our broad range of products finds its way to end users and smaller wholesalers all around the world.

In-house service centre

We have our own service center with which we perform all sorts of stainless steel and aluminium services. The advanced machines in our own service centre are operated by experienced professionals leading to the best result for our customers.

Decoiling

In addition to standard sheets and plates, HEGO is specialised in decoiling stainless steel and aluminium, we also decoil non-standard sizes, according to your request. The range of the machine: length up to 13 meters, width up to 2 meters and thickness from 0.3 mm up to 12 mm

Polishing and brushing

Our fully automatic Timesavers Grindingmaster machine is able to polish stainless steel sheets both one and two sided. We use different types of abrasive bands and a wide range of grains, depending on your wishes. Our machine is able to polish sheets in a wide range of sizes. The width range of the machine is 50 centimeters to 2 meters and a length range of 50 centimeters to 6 meters.

Cutting

Small or big series, our SafanDarley cutting machine enables us to cut aluminium and stainless steel sheets and plates of up to 4.3 meters length, and 0.3 to 6 mm thickness for stainless and 8 mm

thickness for aluminium in a great variety of lengths and widths. Also specials, like skirting boards, cover strips or angle protections are no problem for us.

Other services

Please contact us at info@hego.nl for more information about all our services, such as, slitting, laser and waterjet cutting, sawing, edging & setting and leveling.

Stock Online

With our stock online tool, our customers can easily see our available stock, select materials and request a quote 24/7.

The best deal in aluminium and stainless steel

Due to our excellent relationships with suppliers, we can offer competitive prices. This in combination with our prompt delivery, our expert team of multilingual account managers and our available stock ensures us to create the best deal in aluminium and stainless steel.
